INDEX: VOLUME 27

AUTHORS AND SUBJECTS

Affect 338–376.
Anderson, Paul A., & Thorson, Stuart J. Artificial intelligence-based simulations of foreign policy decision making. 194–199.
Anorexia nervosa 140–154.
Artificial intelligence 176–193.
Association 77–90.
Auto-organization 323–337.
Backtracking 214–248.
Balance 104–117, 155–161.
Baseball All-Stars 273–280.
Behavior 1–11.
Ben-Dov, Yosi, & Shilony, Yuval. Power and importance in a theory of lobbying. 69–76.
Bigelow, John. A catastrophe model of organizational change. 26–42.
Biopsychosocial systems 118–124.
Black box 1–11.
Block model 12–25.
Bond, Nicholas A.: see Beverly A. Hovsepian.
Book Reviews:
- Alter, Steven L. *Decision support systems: Current practice and continuing challenges*, (David Stodolsky, rev.). 91–92.
- Anderson, R. M., Turner, B. D., & Taylor, L. R. (Eds.). *Population dynamics*, (Richard Wiegart, rev.). 402–405.
- Green, Thomas F., Ericson, David P., & Seidman, Robert H. *Predicting the behavior of the educational system*, (Gordon C. Ruscoe, rev.). 197–199.
- Hofstede, Geert. *Culture's consequences: International differences in work-related values*, (Stephen L. Merker, rev.). 195–197.
- Naylor, J. C., Prichard, R. D., & Ilgen, D. R. *A theory of behavior in organizations*, (Arnold S. Tannenbaum, rev.). 194–195.
- Zeleny, Milan (Ed.). *Autopoiesis: A theory of living organization*, (William J. Horvath, rev.). 298–299.

Brams, Steven J., & Hessel, Marek P. Absorbing outcomes in 2 × 2 games. 393–401.
Bosserman, Robert W. The internal security subsystem. 95–103.
Callahan, Jim. A geometic model of anorexia and its treatment. 140–154.
Catastrophe theory 26–42, 131–139, 140–154, 259–272.
Change 26–42, 387–392.
Channel and net subsystem 214–248.
Classification 377–386.
Clinical medicine 164–175.
Cluster analysis 77–90.
Coalition theory 77–90, 125–130.
Cognition 104–117, 338–376.
Color matching 131–139.
Communication 104–117.
Computer model 164–175.
Computer simulation 176–193.
Conceptual system 1–11, 393–401.
Control processes 323–337.
Core 57–68.
Cross-level analysis 377–386.
Cybernetics 1–11, 323–337.
Decision control 338–376.
Decision making 12–25, 43–56, 57–68, 69–76, 77–90, 118–124, 125–130, 164–175, 176–193, 273–280, 281–297, 387–392, 393–401.
Diffusion theory 214–248.
Distributor subsystem 214–248.
Dynamic analysis 393–401.
Earth 303–322.
Ecological systems 303–322.
Entropy 118–124.
Equilibrium 393–401.
Error reduction 95–103.
Feedback 1–11.
Foreign policy 176–193.
Form 249–258.
Function 249–258.
Game theory 57–68, 273–280, 393–401.
General systems theory 377–386.
Glanville, Ranulph. Inside every white box there are two black boxes trying to get out. 1–11.
Golden Rule 155–161.
Governments 176–193.
Graph theory 162–163.
Grofman, Bernard. A dynamic model of protocoalition formation in ideological *n*-space. 77–90.
Group 43–56, 69–76, 77–90, 104–117, 118–124, 125–130, 131–139, 162–163, 214–248.
Guastello, Stephen J. Color matching and shift work: An industrial application of the cusp-difference equation. 131–139.
Guastello, Stephen J. Moderator regression and the cusp catastrophe: Application of two-stage personnel selection, training, therapy, and policy evaluation. 259–272.
Guntern, Gottlieb. Auto-organization in human systems. 323–337.
Harary, Frank. Oedipus loves his mother. 162–163.
Harary, Frank. Variations on the Golden Rule. 155–161.
Hessel, Marek P.: see Steven J. Brams.
Hierarchies 12–25, 338–376.
Hoffman, Elizabeth, & Packel, Edward W.: A stochastic model of committee voting with exogenous costs. Theory and experiments. 43–56.
Horvath, William J.: see book reviews, Milan Zeleny.
Hovsepian, Beverly A., Bond, Nicholas A., & Ludlow, Larry. Multiattribute evaluation in baseball All-Star predictions. 273–280.
Individual 1–11, 140–154, 259–272, 323–337.
Information processing 131–139, 338–376.
Information theory 104–117.
Input 1–11.
Input transducer 176–193.
Invariance 338–376.
Katakis, Charis D.: see Dimitri F. Katakis.

Hierarchies 12–25, 338–376.
Hoffman, Elizabeth, & Packel, Edward W.: A stochastic model of committee voting with exogenous costs. Theory and experiments. 43–56.
Horvath, William J.: see book reviews, Milan Zeleny.
Hovsepian, Beverly A., Bond, Nicholas A., & Ludlow, Larry. Multiattribute evaluation in baseball All-Star predictions. 273–280.
Individual 1–11, 140–154, 259–272, 323–337.
Information processing 131–139, 338–376.
Information theory 104–117.
Input 1–11.
Input transducer 176–193.
Invariance 338–376.
Katakis, Charis D.: see Dimitri F. Katakis.

Katakis, Dimitri F., & Katakis, Charis D. Teleonomic entropy in biopsychosocial systems. 118–124.
Kinship 162–163.
Kleinmuntz, Benjamin. Computational and noncomputational clinical information processing by computer. 164–175.
Kunreuther, Howard, Lathrop, John, & Linnerooth, Joanne. A descriptive model of choice for siting facilities. 281–297.
Language 377–386.
Lathrop, John: see Howard Kunreuther.
Life-span development 338–376.
Linnerooth, Joanne: see Howard Kunreuther.
Liquefied natural gas 281–297.
Living systems 95–103, 203–213, 214–248, 273–280, 303–322.
Lobbyist 69–76.
Ludlow, Larry: see Beverly A. Hovsepian.
Majority rule 43–56.
Management 387–392.
Man-machine system 131–139.
Markov chain 43–56.
Medicine 164–175.
Merker, Stephen L.: see book reviews, Geert Hofstede.
Michener, H. Andrew, & Yuen, Kenneth: A competitive test of the core solution in side-payment games. 57–68.
Miller, James Grier, & Miller, Jessie L. The Earth as a system. 303–322.
Miller, Jessie L.: see James Grier Miller.
Model 12–25, 77–90, 164–175, 281–297.
Moderator regression 259–272.
Multiattribute evaluation 273–280.
Multiattribute multiparty model 281–297.
Multilevel system 131–139.
Murnighan, J. Keith. Evaluating theoretical predictions in the social sciences. Coalition theories and other models. 125–130.
Network 12–25.
Nonliving systems 214–248, 303–322.
N-person games 57–68.
Object 1–11.
Oedipus 162–163.
Oliva, Terence A: see Stephanie S. Robbins.
Organism 118–124, 164–175, 214–248, 338–376.
Organization 12–25, 26–42, 77–90, 118–124, 125–130, 131–139, 203–213, 259–272, 387–392.
Organizational change 26–42.
Organizational effectiveness 203–213.
Organizational practice 26–42.
Output 1–11.
Output transducer 164–175.
Packel, Edward W.: see Elizabeth Hoffman.
Personality integration 338–376.
Personnel selection 259–272.
Policy evaluation 259–272.
Political decision making 77–90.
Powell, Arnold, Royce, Joseph R., & Voorhees, Burton. Personality as a complex information-processing system. 338–376.
Power relations 214–248.
Practice, organizational 26–42.
Prestige hierarchy 12–25.
Process analysis 203–213.
Process efficiency 203–213.
Ramaprasad, Arkalgud. Revolutionary change and strategic management. 387–392.
Reproduction 1–11.
Residual pockets 214–248.
Revolutionary change 387–392.
Risk management 282–297.
Robbins, Stephanie S., & Oliva, Terence A. Empirical identification of fifty-one core general systems theory vocabulary components. 377–386.

Ruscoe, Gordon C. Application of living sytems process analysis to army organizations: A review and critique. 203–213.
Ruscoe, Gordon C.: see book reviews, Thomas F. Green.
Sahal, Devendra. Structure and self-organization 249–258.
Scharfe, Hartmut. Expansions: A study in the unity of science. 214–248.
Security processes 95–103.
Selection bias 259–272.
Self-organization 249–258.
Self-reproduction 1–11.
Shapley value 57–68.
Sharp, John M., Shin, Eui Hang, & Smith, LeRoy F. A network analysis of departmental prestige based on the origins of faculty degrees. 12–25.
Shift work 131–139.
Shilony, Yuval: see Yosi Ben-Dov.
Shin, Eui Hang: see John M. Sharp.
Side-payment games 57–68.
Silver Rule 155–161.
Siting facilities 281–297.
Smith, LeRoy F.: see John M. Sharp.
Social choice 393–401.
Social system 77–90.
Society 77–90, 118–124, 125–130, 281–297.
Sociomatrix 12–25.
Spacial model 77–90.
Stochastic solution 43–56.
Structural balance 155–161.
Structure 249–258.
Subsystems, all 303–322.
Supporter subsystem 43–56.
Supranational system 77–90, 125–130, 214–248, 303–322.
System levels, all 249–258, 323–337, 338–376.
Systems 377–386.
Tannenbaum, Arnold S.: see book reviews, J. C. Naylor.
Teleological explanation 176–193.
Teleonomic entropy 118–124.
Theory Z 387–392.
Thermodynamics 323–337.
Thorson, Stuart J.: see Paul A. Anderson.
Training 259–272.
Transformation 338–376.
Uncertainty 338–376.
Utility 259–272.
Vocabulary 377–386.
Voorhees, Burton: see Arnold Powell.
Voting experiments 43–56.
White box 1–11.
White, James M. Dyadic systems analysis. 104–117.
Wiegert, Richard: see book reviews, R. M. Anderson.
Worldwide policy 303–322.
Yuen, Kenneth: see H. Andrew Michener.
